

The WOMBAT Kit Car

The New Wombat Mini SUV

Tired of seeing "your" car being driven by everyone else on the road?

Imagine owning a custom, unique, limited production vehicle!

The Wombat combines one of a kind good looks, fun driving, off road ability, practicality and economy in a very affordable package.

Owners say driving a Wombat is like being in a parade.

It takes two people to fill the gas tank-- one to handle the pump, and one to answer questions.

Wombats are available as You-Build-It Rebody Kits.

Turnkeys also available.

The Wombat is a steel-framed, fiberglass bodied car that is built on the venerable VW Beetle chassis, giving it the off-road ability to match its tough looks. It takes its styling cues from the military. The custom design is a real attention getter, attracting second and third looks wherever it goes.

The Wombat Rebody kit is a high quality product, that uses class "A" fiberglass and sturdy steel subframes. We have worked to make this a simple project to complete. Assembly requires bonding the body to a stock, standard VW chassis that has had its floorpans removed. Factory mount points and all running gear are used. Completion of a Wombat requires 80-120 hours after the pan/chassis is prepared.

The Wombat is not a dune buggy. Unsupported dunebuggies lack the steel frame that makes the Wombat such a stiff smooth, and durable product.

Summary of Wombat Kit Contents

- **Fiberglass** (3/16" Laminate): Body, Hood, Windshield Frame, Dash
- **Steel:** Body Sub-Frame, Bumpers, Brush Guard, Tire Rack, Top Support Frame
- **Electrical:** Wiring Harness, Full Lighting & Reflector Package, Wiper Motors.
- **Hardware:** Hinges, Mount Brackets, Nuts & Bolts, etc. Most miscellaneous items are included.
- **Labor:** Body is jig-bonded to the sub-frame; firewall is installed. Most necessary cutouts performed.
Most post-mold preparation of the body is performed. Shells are sanded, primer gray colored gel coat.

You Supply-- VW Chassis and Running Gear (Engine, Transmission, Etc.), Tires & Wheels, Early Style Fuel Tank, Interior, Seats, Windshield Glass, Mirrors, Paint, Headlight Bulbs, Battery Tray & Hold Downs, Wiper Motor & Wipers.
